Hake's Bid for the East Teanessee.

(Ispecial Despain to the Courter-Journal)

Namyulla, Oct 16.—There is hardly anything talked about to-night except the Sens-torial election, which comes off to-morrow. Looking over the field at this hour, and making an estimate from an impartial sinanfpoint, it is really hamridous to risk a guess as to who will be elected. There is little doubt that Johnson has lost strength within the last few dyn, but whether unfleted to defeat him is deubtful. It is very probable he will not be elected on the first ballot, and may not be elected at sil.

elected on the first ballot, and may not be elected at all.

Etheridge made a speech in the Senate today, coming out strongly against repudiation. This will help him with a number of East Tempescens. The skyles Republican members have decided to vote for Secretary Fletcher on the first ballot, nearly all of them hewever, will eventually vote for Etheridge, if by se doing they can defeat Johnson. The indications are that there will be no election to morrow.

There are rumors of bribery being brought to bear on members in the isserest of Andy.

Immigration.

The extraordinary rush of immigrants to this country during the three months ending June 30, of the present year, is worth noting. The total number was 165,987—being a very large increase over the same period in previous years. The class of immigrants, too, is unusually good. We find among them, for example, 60 clergymen, 65 physicians, 58 artists, 5,559 mechanics, 838 bakers, 233 butchers, 74 seamstresses, 738 shoemskers, 765 tailors, 1,058 masons, 1,518 of miscellaneous trades, 560 clerks, 15,555 farmers, 46,235 laborers, 250 clerks, 15,55 560 cierks, 15,558 farmers, 46,235 laborers, 1,943 traders, 8,108 mariners, 496 mariners, 5,799 servants and 768 of other specified occupations. Again, it is worthy of note that while Ireland sends 26,138, "Great Britain" (meaning, we may suppose, England, Ireland and Wales,) sends 28,574.

ROUND-ABOUT.

The Atlantic Almanae for 1970 contains a characteristic poem by Thickeray called "My First Walts," a humerons story by Dickens with the title of "Chops, the Dwarf," and a fine poem by Tennyson extitled "The Mystle;" all now published for the first time. Besides these tempting literary good things, there is something by Mary Russell Mittord, James Russell Lowell, William Callen Bryant, and some leaser lights. The astronousleni and statistical matter is particularly good. The pictures are attractive and artistic, and the whole appearance of the park highly creditable to Messrs. Fields, Os-

Crime in Ireland.

The Lopdon Times publishes some interesting facts and figures relative to the dangerous classes in Ireland, from which it appears that there has been a marked decrease in the number of persons imprisoned for crime daring the last fiftees years. It is a remarkable fact that, according to the data given, no sentence of death was passed in Ireland during the year 1898. The average daily number of prisoners in the county and borough julis (exclusive of debtors), eighteen years ago, was upward of ten thousand; on the lat of January it was only two thousand. The attention given by the Government to the amelioration of the condition of the people has begun to have its legitimate effect. The beneficial indicence of the present system of dealing with prisoners has also had a great deal to

ing with prisoners has also had a great deal to do with the decrease of crime in Ireland. It is expected that a still further reduction in inited effort that this godless village civilized and Christianized. It has se cremines and curatuatived. It has consolong without the Bible that its itself condition has even excited the live-anxiety of Chicago. The proposed reise step in the right direction, and there much hope for Cuestnanti as there is for ricids of foreign missions.

The owners of fast horse-fiesh still have a chattee to get the one hundred thousand dillars Mr. Robert Bonner offers for a horse that can 'trot a mile in 2:31/4 to a road wagon and driver weighing 518 pounds without randing, jumping or skipping, every meh to be trotted." He claims the privilege of witnessing and timing the trial, taking with him several friends, the same privilege to be granted to the owner of the horse but there is to be foundered old horses in the country. Some enterprising "sport" might buy up all the old bags of bones on the commons and keep trying their speed until he does get one that will make the time.

He is a mild, pleasant man, and gives satisfaction to all parties.

Ballie Peyton is the oldest man in the Senate, and, although he is frequently spoken of in connection with the Senatorship at Weshington, it a not probable that he will be chosen. Not much strength has been developed for him by the skirmishing of his friends.

One of Johnson's tailors is in the Senato, in the person of L. F. Self. Mr. Self is from Greenville, the home of A. J., and learned his trade under that famous workman. It may be set down as tolerable crim in the Benater and brother of the beach.
